- Violin- 4<sup>th</sup> and 5<sup>th</sup> Grade
- Magnet Mondays- Grade 4

## IN THIS ISSUE

- 3RD GRADE BALLET TECH
- 5TH GRADE MFTA FIELD TRIP AND PBL
- IMPORTANT DATES

## ***Third Grade Ballet Tech Auditions at Bellaire Magnet School***

Third grade students at Bellaire recently had a unique and exciting opportunity as Ballet Tech visited our school to hold auditions for their esteemed training program.

During the visit, students participated in a movement-based audition designed to assess focus, coordination, musicality, and willingness to learn. This experience gave students an authentic look into the world of classical ballet while encouraging confidence, discipline, and self-expression through movement.

Students selected through the audition process will have the opportunity to attend Ballet Tech's program, where they will learn the foundations of Ballet in a sequential training model. The program emphasizes strong technique, artistry, and dedication, providing students with access to high-quality ballet instruction in a professional setting.

This opportunity reflects Bellaire's commitment to expanding access to the arts and supporting students in discovering new passions through meaningful, real-world experiences. We are proud of all our third graders for their effort, courage, and enthusiasm during the audition process.

## ***Fifth Grade Launch Fabric Waste PBL with Materials for the Arts Field Trip***

Fifth grade students at Bellaire have officially launched their Project-Based Learning (PBL) unit on fabric waste, beginning with an immersive field trip to Materials for the Arts.

During the visit, students explored how donated and discarded materials, particularly fabric and textiles, can be reused instead of ending up in landfills. Through hands-on exploration and guided discussion, students learned about the environmental impact of textile waste and examined how creative reuse can support sustainability and responsible consumption.

The experience encouraged students to think critically about everyday materials, where they come from, and how they can be repurposed in meaningful ways. Students gathered inspiration and ideas that will directly inform their upcoming work, as they design and create new items using reclaimed fabric as part of their Fabric Waste PBL unit.

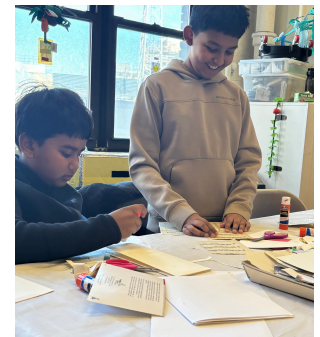

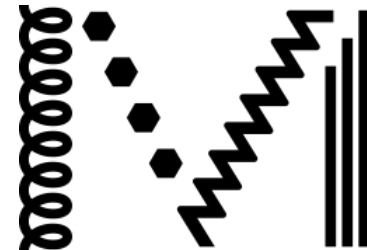

This learning experience supports Bellaire's commitment to sustainability, creativity, and real-world problem solving, empowering students to see themselves as designers, innovators, and environmental advocates.
